***Specification***

The examiner has not checked the specification to the extent necessary to determine the presence of **all** possible minor errors (grammatical, typographical and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any future amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of any copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, **if any**.

The status of the parent application(s) and/or any other application(s) cross-referenced to this application, if **any**, should be updated in a timely manner.

***Response to Amendment***

It should be noted that applicants' amendment lists claims 13-14 as withdrawn. It should be noted that these claims were in fact canceled in the examiner's amendment of February 2, 2001.

***Allowable Subject Matter***

Claims 1-12 and 15 are allowable over the prior art of record because the amended claims require a specifically claimed multimetal cyanide compound, wherein the catalyst suspension contains both a polyether and a surface active substance that are not the same.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0,761,708 or under 35 U.S.C. 102(a) as being anticipated by WO 99/19063 for exactly the same reasons set forth in the previous office action for the rejection of claims 1-12 and 15.

### ***Response to Arguments***

Applicants' comments assert that the newly added claims are distinct from these references because the characteristics of the MMC compound being claimed by applicants are actually characteristics of the **starting material** for the catalyst suspension, rather than a product that would inherently be produced. This is not convincing and is not, in fact, supported by a reading of the instant specification. It is clear from reading the entire disclosure of this application that certain metal cyanide compounds are added to a suspension with the complexing agents and so forth and this results in a suspension having the specific MMC being claimed herein. Applicants' own examples clearly show that a hexacyanocobaltic acid (i.e. the multimetal compound) is used for **BOTH comparative and inventive examples**. No X-ray diffraction spectrum is given for this material. Only after it is put in suspension are the characteristics measured. This is clear evidence that this application itself does not support the arguments now being made with respect to new claims 16-20. The starting material

used by applicants is no different from that of the comparative examples and it is clear that the features of the MMC are an "in-situ" result of the components present in suspension.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
